WE GUARANTEE.

That all seeds sold by us shall prove to be as represented, to the extent that should they not do so, we will replace them, or send other seeds to the same value. But we cannot guarantee the crop any further than the above offer, as there are so many causes which operate unfavourably in the germination of seeds in a tropical climate, over which we have no control. Among the causes of failure may be mentioned unfavourable weather, which is one of the most important. The seed may be in proper condition when the seed is planted, but the weather which follows may be too hot, and will dry the seed out, or it may be too hot, and will dry the seed out, or it may be too hot, and will dry the seed out.
